

PRESS RELEASE

Funding the Next Generation

Commercial confidence is rare in the current climate but Hepworth Acoustics are demonstrating belief not just in the present but also the future of acoustics consultancy.

Their far-sighted investment policy has included the sponsorship of a place on the University of Salford's MSc Environmental Acoustics programme. This year's lucky scholarship winner is Miss Reena Mahtani Mirchandani, whose scholarship will cover all her tuition fees.

Giving Reena this chance is a result of Hepworth Acoustic's decision to invest in the next generation of consultants for the industry. They see that this will help the industry to provide a better service to clients by ensuring that suitably qualified staff are available to carry out the necessary acoustic assessment and design services.

"Hepworth's have played a lead role by having the vision to support students with this scholarship," said Dr. Andy Moorhouse, the leader of the programme at Salford, adding "endorsement from a leading company like Hepworth's speaks volumes and we are very grateful."

ENDS

Hepworth Acoustics is one of the largest independent acoustics consultancies in the United Kingdom. The head office is in Warrington and the company operates from eleven regional offices. The company specialises in environmental and building acoustics as well as noise mapping. More information on all aspects of acoustics consultancy are available at www.hepworth-acoustics.co.uk .
